

Here are the instructions to mount the DC power add-on to VU007B :

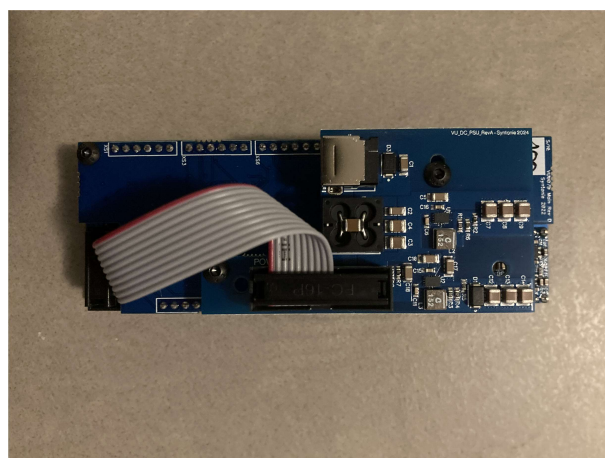

1) Unscrew the two screws circled in red

2) Add the two 8mm MF spacers in place of the screws

3) Mount the PSU add-on board on the spacers using the previously removed screws, and use the 8cm ribbon cable to connect the PSU board to the module

4) Connect +12VDC power to the DC barrel input. VU007B current consumption : 230mA
